Summary

Flutter developer with production experience building cross-platform mobile applications for real clients and real users. Comfortable owning features end-to-end — from Firebase architecture and state management to responsive UI and client delivery. Hackathon track record (Runner-Up, Cyberthon.ai 2025) and ML internship background mean I think about products holistically, not just the widget layer. Looking to contribute to a team that ships fast, values code quality, and takes client outcomes seriously.

Technical Skills

Mobile Development: Flutter (cross-platform iOS & Android), Firebase Auth, Cloud Firestore, Firebase Cloud Messaging (FCM)

Architecture & Patterns: GetX, Provider, State Management, REST API Integration, Role-Based Access Control, Real-Time Databases

Languages: Dart, Python, Java, SQL **Data & ML:** Pandas, NumPy, scikit-learn

Tools & Platforms: Git, GitHub, Android Studio, VS Code

Experience

Flutter Developer Intern

May 2025 – Dec 2025

Kampus Konnect

Mohali, Punjab

- Delivered a production-ready Flutter application end-to-end for a live client — from requirements gathering and UI design through testing and QA — shipping on schedule with zero critical bugs at handoff.
- Implemented responsive UI components, multi-step form handling, and client-side data validation using Flutter best practices, meeting all defined functional and UI/UX requirements.
- Collaborated directly with stakeholders across sprint cycles to gather requirements, present progress, iterate on feedback, and ensure alignment with business goals.
- Maintained clean branching and version control workflows using Git & GitHub throughout the full development lifecycle.

Machine Learning Intern

June 2024 – July 2024

CETPA Infotech Pvt. Ltd.

Remote

- Built a social media reach analysis and prediction pipeline in Python (scikit-learn, Pandas) to model engagement trends and forecast content reach.
- Performed data cleaning, feature selection, and exploratory data analysis on raw engagement datasets, improving input quality for downstream predictive models.
- Trained and evaluated multiple regression models using scikit-learn; interpreted outputs to derive actionable insights and documented findings for reporting and presentation.

Projects

Veil — Anonymous Chat Application | Flutter, Firebase Auth, Firestore, FCM | GitHub

2025

- Architected and shipped a cross-platform anonymous chat app (iOS + Android) with interest-based user matching, enabling users to connect without revealing identity.
- Implemented Firebase Authentication with multi-level user verification for secure, anonymous access; enforced zero-PII exposure at the database layer via role-scoped Firestore security rules.
- Integrated Firebase Cloud Messaging (FCM) for real-time push notifications, ensuring reliable message delivery across both foreground and background app states.
- Built scalable, performant UI components with a focus on smooth UX and fast load times across device sizes.

Production Line Management Application | Flutter, Firebase Auth, Firestore | GitHub

2024

- Developed a mobile application to digitize and streamline production line operations, replacing a manual paper-based process with real-time Firestore sync across multiple operator roles.
- Delivered an intuitive data-entry UI that reduced manual logging time by ~40%, improving operational efficiency through process automation and live production visibility.
- Implemented role-based authentication using Firebase Auth, restricting data access by user role and securing sensitive inventory and production records.

Education

Chandigarh University

B.E. — Computer Science Engineering | CGPA: 7.24

Mohali, Punjab

Expected May 2026

Achievements & Leadership

- **Runner-Up**, Cyberthon.ai 2025 — Hackathon by Chandigarh Police | **2nd Runner-Up**, Hack with Tricity — North Zone Hackathon
- **Secretary**, Microsoft Student Chapter, Chandigarh University — managed events and professional society operations for the chapter
- Organized and managed **30+ university and national-level technical events**; coordinated logistics, speakers, and participant experience
- **Project Lead**, Insight Universe YouTube Podcast Series | **Multimedia Director**, Connecting All Circles Club
